

EDISON STATE COLLEGE

Center for Professional Development

PHLEBOTOMY TECHNICIAN

This program is designed for persons employed or those who plan to be employed by a licensed clinical laboratory or public health department. The course combines 48 hours of classroom instruction with a 100-hour off-site clinical externship coordinated by Boston Reed, to provide students with a comprehensive learning experience.

Lectures include but are not limited to the theory, anatomy and terminology pertaining to the circulatory system, specimen collection, risk factors and complications and quality assurance in specimen collection. Practical instruction provides hands-on training in venipuncture technique with procedures verified through a skills check-off system.

The 100-hour externship includes at minimum 100 successful venipunctures and 10 skin punctures. Upon completion of the program the student will receive a certificate of completion.

Our course meets the requirements for NCCT certification. There are no state training regulations for phlebotomy in Florida.

Cost includes textbooks, course materials, externship placement and certificate of completion.

Dates: August 17th – September 30th (7 weeks)
Tuesdays and Thursdays, 6pm – 9:30pm

Cost: \$2,810. (Textbooks are included)
